GHOUTI YELLES CHAOUCHE

CYBERSECURITY ENGINEER | PURPLE TEAM SPECIALIST

Tlemcen, Algeria | 0549944546 | ghouti.yelles@engineer.com
linkedin.com/in/ghouti-yelles-chaouche | github.com/GhoutiYellesCH

EDUCATION

Engineer's Degree, Network & System Admin
University of Tlemcen
Sep 2025 – Jun 2028

- **Skills:** Network Engineering, Security, Web Dev, Databases.

Engineer's Degree, Computer & Info Science
University of Tlemcen
Sep 2024 – Jun 2025

- **Activities:** CyWork Club.

Engineer's Degree, Artificial Intelligence
University of Tlemcen
Jan 2022 – Jun 2024

- **Skills:** AI/ML, Hardware, Math.

Baccalauréat
Algeria
2022

CERTIFICATIONS

- Extensive coursework in AWS, Cisco CCNA, CompTIA, and CEH.
- Active CTF competitor on HackTheBox and TryHackMe.
- reading and creating writeups

PROFESSIONAL SUMMARY

A versatile Cybersecurity Engineer with a strong "Purple Team" mindset, bridging the gap between offensive security (Red Team) and defensive operations (Blue Team) using cyber kill chain framework. Hands-on experience engineering custom malware, C2 servers, and advanced exploitation tools, combined with deploying robust defensive architectures (SIEM, IDS/IPS). Currently driving security initiatives at a fast-paced startup and leading a 70-person university student in club as tech department. A proven talent combining systems engineering, full-stack application development, and advanced AI integration.

PROFESSIONAL EXPERIENCE

Cybersecurity Specialist | *Yanova Solution* **Oct 2025 – Present**

- Drive technical cybersecurity initiatives and penetration testing, adhering to strict corporate security specifications.
- Engineer and manage secure infrastructure leveraging Raspberry Pi hardware, enterprise servers, and advanced AI workflows.

Chief of Technology Department | *Cywork Club* **Aug 2024 – Feb 2025**

- Direct and mentor a department of 70+ students across three specialized divisions: Programming, Cybersecurity, and Hardware (Embedded Systems).
- Architected and deployed a virtual company infrastructure from the ground up, executing full Active Directory implementation and comprehensive server administration.

RED TEAM (OFFENSIVE)

- **Custom Malware & Exploits:** Engineered Rust-based multi-layer malware, C++/Python botnets, ransomware simulations, and custom Python/Go scripts.
- **Advanced Exploitation:** Developed TCP/UDP multithreaded C2 servers, direct code injection exploits, and Windows token privilege escalation tools.
- **Web & App Security:** Built AI-driven SQLi/XSS vulnerability testers and Man-in-the-Browser (MitB) simulations.

HONORS & AWARDS

Hackfest Hackathon
CyWork Club
Apr 2024

- 3-day hackathon: Arduino, Web Dev, and a 10-flag CTF simulation.

LANGUAGES

Arabic: Native

English: Professional

French: Elementary

- **OSINT & Recon:** Programmed intelligence-gathering Telegram/IRC bots and custom data-scraping utilities.

BLUE TEAM (DEFENSIVE)

- **Threat Detection & SIEM:** Configured ELK Stack for comprehensive log analysis and authored custom YARA rules for threat identification.
- **Deception & NIDS:** Designed honeypots utilizing fake 0-day vulnerabilities. Implemented Zero-Trust NIDS using Zeek/Suricata.
- **Incident Response:** Executed Tier 1, 2, and 3 SOC virtual simulations using Remnux and FlareVM for rigorous malware analysis.
- **Vulnerable Environments:** Deployed the Game of Active Directory (GOAD) to analyze attack vectors against enterprise domains.

FULL-STACK & SYSTEMS ENGINEERING

- **Software Development:** Built high-performance web/mobile applications utilizing Next.js, Node.js, Express, Django, Flask, React, Flutter, and Tauri.
- **Data & AI Architecture:** Proficient with Firebase, MongoDB, and Supabase. Integrated Vector Databases, LoRA layers, RAG, and AI agents.
- **Systems Engineering:** Created a custom Linux distribution from scratch and developed cryptographic simulations (ROT13, RSA payload generators).
- **Hardware & Embedded Systems:** Engineered the "Glove AGF" smart glove project (Jan – May 2024) at the University of Tlemcen, merging physical sensors with advanced Deep Learning Model (View Project).
