PROFILE

Cybersecurity leader and founder with a Master's in Networks and Distributed Systems, building plug-and-play network-defense hardware and full-stack web platforms for enterprise clients. Co-founder and CTO of Yanova Solutions, an Algerian cybersecurity startup recognized by the Ministry of Entrepreneurship as a top-7 innovative startup (2025). Track record spans IDS/IPS product architecture, hardened OS design, and client-facing web and 3D platforms, alongside three semesters of university-level instruction in algorithms, Linux, OOP, and low-level systems programming.

EXPERIENCE

Co-Founder & CTO | Yanova Solutions *Feb 2025 – Present*

- Co-founded and set the technical direction for an Algerian cybersecurity startup delivering plug-and-play network defense hardware and software, earning a Ministry of Entrepreneurship Innovation Label and a top-7 ranking among innovative Algerian startups (2025).
- Architected the Yanova security product suite — IDS/IPS appliances, a hardened OS, and secure log storage — integrating custom hardware with enterprise-grade software.
- Direct Spectra Agency, Yanova's client-facing digital and creative arm, overseeing web, 3D, and interactive platform delivery for enterprise clients including Novo Nordisk/ALDAPH SPA.
- Lead a cross-functional technical team (full-stack development, cybersecurity engineering) and manage 50/50 ownership and operational strategy to scale services across the Algerian market.

Adjunct Lecturer (Vacataire) | University of Tlemcen *Sept 2024 – Jan 2026*

- Instructed Master's and Bachelor's students across three semesters in Algorithms, Linux Systems, Object-Oriented Programming (OOP), Binary Systems, and Assembly.
- Designed and graded practical labs that strengthened student proficiency in systems-level and low-level programming.

Vice President & Founder | CyWork Club *Jan 2023 – June 2024*

- Founded the club and delivered technical training in Networking, Cybersecurity, Linux, and Python to student cohorts.
- Organized technical events and live cybersecurity tool/lab demonstrations, growing a community of security enthusiasts on campus.

CYBERSECURITY PROJECTS

Cerberus Pi — *Raspberry Pi 5 IDS/IPS & Network Mapper* *2025*

- Built a Raspberry Pi 5-based intrusion detection/prevention system with real-time network scanning and topology mapping through a plug-and-play interface; Ministry-labelled innovative project, ranked top 7 in Algeria (2025).

ReconOne — *Hardware Vulnerability Assessment Tool* *2025*

- Engineered a hardware-based penetration testing appliance that automates network audits and generates detailed security reports.

Yanova OS — *Hardened Security Operating System* *2025*

- Architected a Debian-based hardened OS purpose-built for centralized network monitoring and security management.

NAS Pi — *Secure Log Storage Appliance* *2025*

- Created a dedicated Raspberry Pi NAS server to store and forensically analyze Cerberus Pi logs.

Cybersecurity Awareness Program — *Training Curriculum & Live-Attack Simulations* *2025 – 2026*

- Developed a 6-module cybersecurity awareness curriculum with full slide decks and Arabic summary materials for the networking module.
- Designed a cybersecurity awareness-day pitch featuring four live attack-simulation modules, targeted at Algerian training centers.

WEB & SOFTWARE DEVELOPMENT PROJECTS

FlexTouch 360° — *Interactive 3D Web Platform — Novo Nordisk / ALDAPH SPA* *2026*

- Delivered an interactive iPad and web platform featuring a custom Three.js 3D viewer of a Novo Nordisk insulin pen, with cap-removal animation and interactive dose-dial controls.
- Managed the deal through to signed SLA (24-month maintenance contract, quarterly billing) as an enterprise client engagement for Spectra Agency.

GitHub Portfolio — *Web Development Repositories* *Ongoing*

- Maintains an active portfolio of 26+ repositories spanning React, TypeScript, and full-stack web projects — browsable at github.com/Aizen00Rayen and showcased through the Spectra Agency portfolio at spectraagency.tech.

Yanova Solutions Website — *www.yanovasolutions.tech* *2025*

- Designed and deployed Yanova's official digital presence to showcase its cybersecurity products and services.

IoT Pulse Reader — *Bachelor's Project — Arduino & Android* *2022*

- Built an Arduino-based health monitor paired with a custom mobile app that alerts emergency services during critical health events.

EDUCATION

Master's in Networks and Distributed Systems *2024*
University Aboubekr BELKAID, Tlemcen

Bachelor's in Computer Science *2022*
University Aboubekr BELKAID, Tlemcen

Baccalaureate in Sciences *2019*
Lycée Abdellah BENAISSA, Tlemcen

CERTIFICATIONS

- NSE 1, 2 & 3 (Network Security Expert) — Fortinet, 2024
- Fundamentals of Deep Learning — NVIDIA, 2022

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, Assembly (x86), Shell Scripting, SQL, JavaScript (React, Node.js)
- **Cybersecurity:** Ethical Hacking, IDS/IPS, Vulnerability Assessment, Penetration Testing, Firewalls, VPN, Network Security Architecture
- **Networking:** TCP/IP, Network Topology Mapping, Network Monitoring & Traffic Analysis, Routing & Switching Fundamentals, Fortinet NSE-level Network Security
- **Embedded Systems:** Raspberry Pi, Arduino, Embedded Linux, Hardware-Software Integration, Sensor & IoT Device Development
- **Web & Software:** React, Node.js, PostgreSQL, Three.js/WebGL, Full-Stack Application Architecture
- **Systems:** Linux (Kali, Ubuntu, CentOS, RedHat), Debian-based OS Hardening, Windows

LANGUAGES

- Arabic: Native | French: B2 | English: B2 | German: A2
